

Coaches' Insight Report for McCabe, Annette Marie

12/19/2016

OVERALL TALENT SCORE

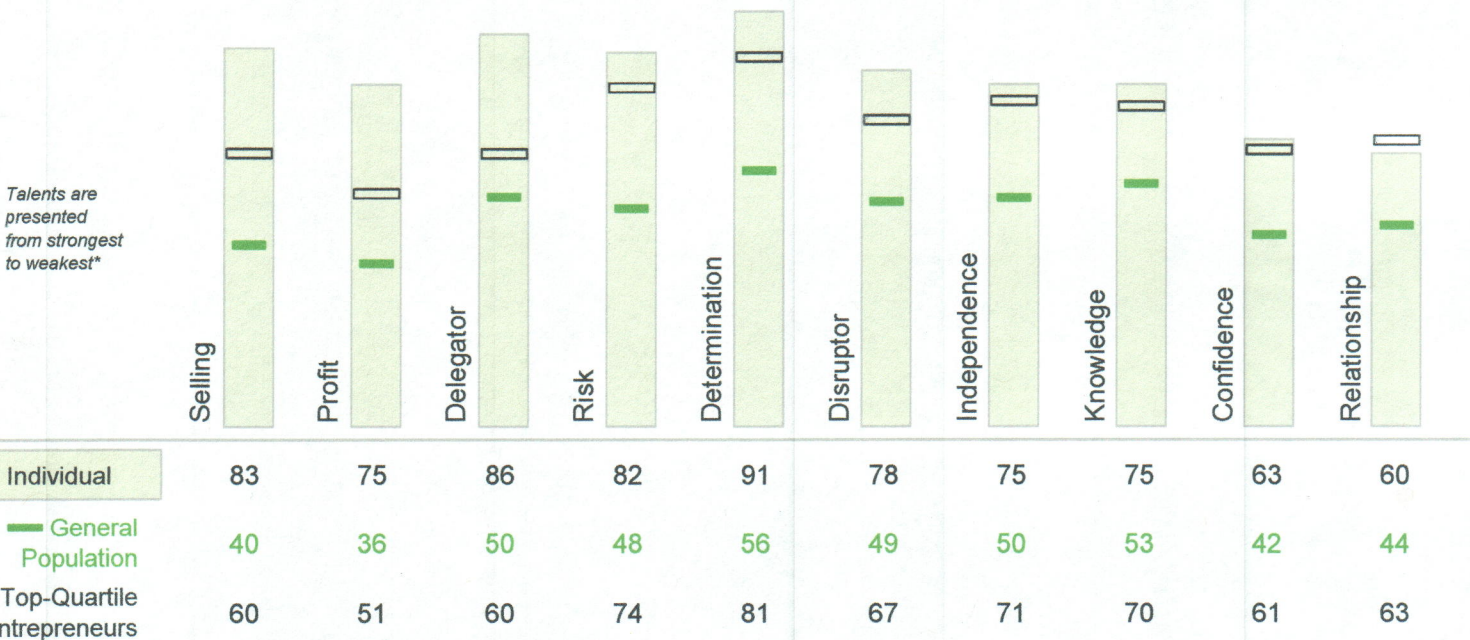

The overall score is the summary result of the EP10 assessment, expressed as a percent score. It is the most predictive of an individual's potential for excellence in an entrepreneurial role.

INDIVIDUAL TALENT SCORES

Gallup calculates an individual score (0–100 scale) for each of the 10 entrepreneurial talents based on the EP10 assessment results. The 10 individual talent scores below illustrate the intensity of each talent, expressed as a percent score. These bars help explain where an individual can make the greatest contribution in an entrepreneurial activity. A higher score illustrates a strong evidence of the given construct or talent.

The results of the individual are compared to two designated research benchmark groups: the general population and entrepreneurs in the top quartile of the Gallup database. The general population is a nationally representative sample of working age adults in the United States.

* Please note that some talents are more common than others among entrepreneurs, thus higher raw scores could be associated with lower ranking and vice versa.
